

AGold's Xtends right there, status quo. Nothing concerning or extremely exciting. They are right there with other companies, good enough to sell.

AsGrow looks good.....I like their Xtend lineup.

P looks stronger in the 3 than the early 2 Xtend.

P Round Up's....normal, wonder why in there, everyone has a good mid-2 RR bean no need to prove that at this point.

I am very surprised with Channel in this plot. That is not what I expected.
