AgriGold 2.4's did well. Marked as "highly productive" which I would guess isn't the same "highly productive" we are used to. I am basing that on the AgriGold 2.4's beating the 2.6, 2.8 and 2.9 handily. We market the 2405 for the tougher acre.

There are a lot of "good" numbers in this plot that we use around Gothenburg that just didn't show well, my guess is soil.

Channel showed up to participate. Average. Pioneer hung in with RR's but the Xtend's didn't not fair well as a group.
